

# KITCHEN BATHROOM LAUNDRY

VOLUME 16

# NO ORDINARY COMPANY

Wholly New Zealand owned and operated, Aquatica has become synonymous with service, reliability and innovation.

From the beginning Malcolm and Christina Box wanted to create a company that reflects their values and they have done just that. At Aquatica everyone from the clients to the staff are treated the way Mal and Chrissy would like to be treated and this is the key to their success.

The focus is on providing products that are beautiful to look at and a pleasure to use and this ranges from the tapware to the newly introduced bathroom range showcased here.

The consistent quality, genuine warranties and what can only be described as fantastic service, have led to repeated calls from clients for Aquatica to provide a full range of bathroomware.

Mal and Chrissy listened and after well over a year of looking at designs, and sourcing partners who fit the Aquatica ethos, they took the plunge and bought the 4500 sq metre property next to the existing purpose built plant in Avondale. This will facilitate the expansion that will see an already trusted New Zealand brand become even bigger and better.

PRODUCT DEVELOPMENT

PRODUCTION PLANNING

Many of the people working at Aquatica have been with the business for over a decade and they share a passion for innovation and service. Staff are carefully chosen for experience and attitude and are regarded as the chief assets of the business.

It isn't hard to save water and it can save you money in the long run. Check out the following suggestions, all of which are possible without any great changes to your family's washing habits.

Saving water is not necessarily about running the tap for a shorter amount of time or having a quicker shower. Families generally run a tap for the same length of time not realising it could be running as high as 15 litres of water per minute. So lowering the flow is the quickest and easiest solution to water saving.

In the bathroom, an easy option for saving water in a mains pressure system\* is to fit our German-made pressure compensating aerator. This can be quickly and easily placed into the aerator housing of your existing bathroom tap and will change the flow of your tap to a soft spray of 3 litres per minute. So if it takes 30 seconds to wash your hands, you could start saving more than 8 litres of water every hand wash. If there are 10 hand washes in your family per day, that's a saving of up to 31,000 litres per year (plus of course the savings in electricity as well).

Around 80% of a home's hot water is used in the shower. If you have good mains pressure, your mixed flow could be up to 20 litres per minute, so a 10 minute shower could use around 200 litres of water. By reducing the flow to 10 litres per minute, you could halve your water usage while still getting a good long shower. A family of four, still showering 10 minutes each a day, could save 400 litres of water a day (or around \$600 a year) plus the cost of heating the water which could be another \$600 a year. So by simply installing an Aquatica 10-litre per minute pressure compensating washer into a handshower hose, substantial savings can be made.

We don't recommend reducing the water flow in the kitchen or over the bath as this doesn't usually save water. You'll want to fill the jug or the bath until almost full - and the quicker, the better!

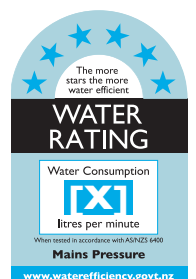

So lowering the flow of water is the quickest solution for saving water and, as we've already said, your family won't need to change their washing habits to do it. If you can adopt other practices, such as turning off the tap while brushing your teeth, you'll save even more!

## SAVE WATER - SAVE POWER - SAVE MONEY

\*Note: These aerators are for mains pressure only. On a low pressure system, fitting an aerator could cause cold water to back-feed into your hot water line.

UNDER THE WELS REGULATIONS, YOU WILL NOTICE TAPWARE AND HANDSHOWERS HAVE STAR RATINGS. THESE RATINGS WILL HELP THE CONSUMER TO MAKE BUYING DECISIONS ON NEW PRODUCTS BASED ON THEIR WATER SAVING FEATURES. THE MORE STARS, THE MORE WATER IS SAVED.

# AQUATICA - TRANSFORMING EVERYDAY LIFE INTO A WORLD OF POSSIBILITIES

Bathrooms and kitchens have become important living spaces in a home adding value and appeal. To enhance the flow of our daily lives they should combine aesthetic desirability, performance and quality.

Aquatica's bathroom taps and accessories are a blend of comfort, sophistication and innovation that will introduce style and quality into any home.

At Aquatica, tapware is designed to fit any budget with styles ranging from ultra-modern to yesterday's classic with the latest technology and engineering.

All of the products in Aquatica's kitchen, bathroom and laundry ranges are assembled at the purpose-built New Zealand factory and carry an excellent, trusted warranty.

## HERE ARE SOME OF THE THINGS OUR CUSTOMERS HAVE TO SAY:

"Our no.1 choice of tapware supplier is Aquatica. Why? Well there are the obvious reasons like quality products and great range, but it's more than that. Aquatica have a great team of people backing their product and supplying amazing service. They are dependable and always willing to go the extra mile. It's because of this that we can sell Aquatica product with confidence."

WALTER GOLDSTEIN, PLUMB'IN GROUP

"Cambridge Homes have been using Aquatica Tapware and Laundry Tubs in our new builds for the last 15 years. We are now excited to be using their new full range of Baths, Showers, Vanities and Toilets. We have always been impressed with both the quality of the product and the service Aquatica provides. Malcolm, the Managing Director is, to put it simply, a hell of a nice guy with a great team and a product we're proud to recommend."

PHILLIP WEBB, CAMBRIDGE HOMES WAIKATO

"We were one of Aquatica's first customers when they started their business over 19 years ago. Now we are one of their single biggest customers and continue to use Aquatica due to their innovative products and great service. We also like to deal with other independent NZ companies."

STAN JUCHNOWICZ, MANAGING DIRECTOR,  
ZIP PLUMBING PLUS, WELLINGTON (17 STORES)

"I have been using Aquatica products through my various housing companies for close to 17 years. Latterly through our modular home company Easybuild we have gone exclusively for Aquatica products for all the tapware and bathroom fittings.

When you are running a nationwide housing company you need to have confidence that you are providing a quality modern product that's available and good value for money. Aquatica ticks all the boxes on that front but there is one overriding factor that keeps us loyal. That is Aquatica's aftersales service which is second to none. On the rare occasion where we have had a problem with a product it has always been put right quickly and often beyond the call of duty."

MIKE FOX, DIRECTOR, EASYBUILD LTD

# WHAT WATER PRESSURE SYSTEM DO YOU HAVE?

The two most common systems are:

## UNEQUAL PRESSURE:

This is the most common system in New Zealand. A header tank or pressure reducing valve is usually used to supply low pressure water to the hot water cylinder.

How to recognise this system

- The cold water flow is much greater than the hot.
- There's a header tank in the loft or a pressure reducing valve just before cold water enters the hot water cylinder.
- Hot water cylinders are marked 3.7m head or 7.6m head.
- Vent pipe through the roof.

## EQUAL MAINS PRESSURE:

This system uses a special hot water cylinder which is fitted with a pressure limiting valve for safety.

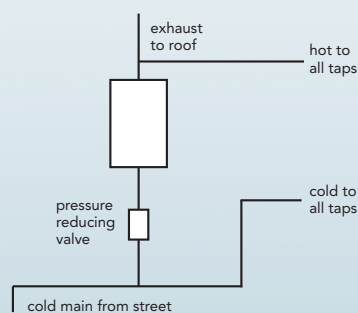

How to recognise this system

- The hot and cold water flow is strong and equal.
- The hot water cylinder is described as a mains pressure cylinder.
- Almost all gas hot water systems are mains pressure.

SELECTING TAPWARE TO SUIT YOUR PRESSURE SYSTEM IS IMPORTANT FOR TROUBLE-FREE OPERATION AND OPTIMUM PERFORMANCE.

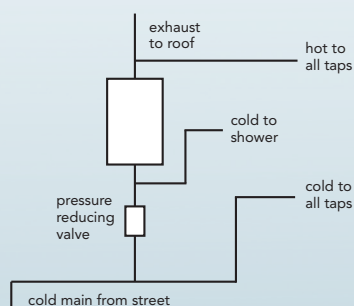

Fortunately, most Aquatica tapware is engineered to work on all pressure systems. However, water pressures vary considerably and it's important to recognise what sort of system you have to help you make an intelligent choice.

### Unequal Pressure Reducing Valve:

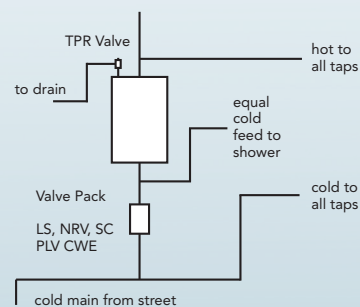

1. COLD WATER IS STRONGER THAN HOT
2. PIPE THROUGH ROOF
3. LOOK AT THE CYLINDER

### Equal Pressure Reducing Valve:

1. COLD WATER IS STRONGER THAN HOT
2. PIPE THROUGH ROOF
3. LOOK AT THE CYLINDER
4. SHOWER FLOW IS LOW AND EQUAL

### Equal Mains Pressure:

1. COLD AND HOT WATER STRONG AND EQUAL
2. LOOK AT THE CYLINDER

# BOOSTER PUMP

Aquatica's economical new booster pump can up to double the flow and pressure output for any home water system.

## KEY ADVANTAGES

- Starts and stops automatically when tap is opened and closed
- Compact and lightweight
- Quiet operation
- 2 Year warranty
- Easy installation
- Can be used as a circulating pump for faster hot water delivery
- Can double flow output on low pressure water systems
- Class F heavy duty insulation - motor safe to run continuously without overheating
- Certified to meet all New Zealand compliance standards

The affordable answer  
to turning your annoying  
water trickle into  
a respectable stream

# SHOWER TECHNOLOGY

## THERMOSTATIC SHOWER MIXER

A thermostatic shower mixer helps to ensure a constant water temperature. This type of mixer provides precise control over the hot and cold water supply which is peace of mind for families with young children. They also contain an anti-scald device which will shut off the water supply should the hot or cold water fail for any reason.

DEJA VU THERMOSTATIC SHOWER MIXER

## EZIMIX SHOWER MIXER DIVERTOR

Aquatica shower mixers are unique in their design and offer features that really perform in low/unequal and mains pressure systems.

The Ezimix Shower Mixer with Divertor has a 45mm cartridge manufactured in Europe and is assembled and tested in New Zealand. It is suitable for equal low, unequal and mains pressure systems (35-600kPa).

The unique disc design provides more water flow and a smoother temperature mix by giving greater control when moving the lever from hot to warm. We also supply a one-way valve for the hot inlet and a flow control valve for the cold inlet. These are fitted at the installer's discretion (dependent on the plumbing system involved) and adapt the mixer to any system - low, unequal or mains.

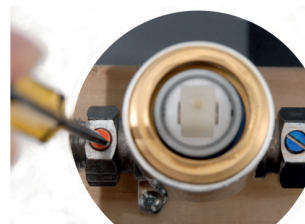

NORMAL SHOWER MIXER CARTRIDGE (LEFT) ANDEZIMIX CARTRIDGE - SEE HOW MUCH BIGGER IT IS

## SHOWER CARTRIDGES

Kerox cartridges have an innovative disc design which provides more water flow and a smoother shower mix, by giving greater control when moving the lever from hot to warm. Built into the shower mixer body are these handy control valves.

These valves allow adjustment of the mixer to either limit the flow of water on mains pressure or balance the flow on unequal pressure. This ensures that mixers can be altered to suit all types of installation.

CONTROL VALVE

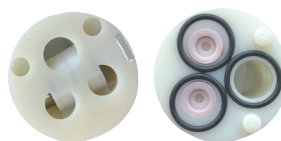

## PRESSURE BALANCING CARTRIDGE

This clever cartridge maintains the water at a constant temperature even when there are changes in flow.

If someone elsewhere in the house turns on a hot tap, the piston inside the cartridge moves across to balance the flow between hot and cold.

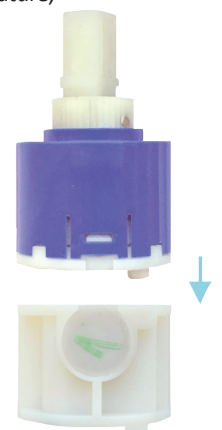

This means you don't feel a change in temperature, only a reduction in the flow.

PRESSURE BALANCING CARTRIDGE

# INNOVATIVE IDEAS FROM **aquatica**

ISOLATOR FILTER STOP

## ISOLATOR FILTER STOPS

Installing isolator filter stops to your taps is a great way of protecting ceramic mechanisms from small particles of dirt. These particles can scratch the ceramic cartridge which can then cause the tap to leak. (This applies to all tapware products, regardless of their origin). Isolator filter stops are an ideal solution to this problem because they:

- Are easy to install
- Provide good filtering on the line and excellent hot and cold flow
- Are easy to access when the filter needs cleaning
- Allow water to be turned off at the sink (rather than at the mains)
- Come with a stainless steel backing flange for a really smart finish

## XERA AND OBLIO WATER FILTER MIXERS

The Xera and Oblio water filter mixers include a long life water filter cartridge, sourced from America.

The KDF/GAC is a “two-media” cartridge consisting of KDF (high-purity copper-zinc alloy) and GAC (granular activated carbon), providing superior filtration qualities.

Through the electrolytic and oxidation reactions of the KDF and the absorption and entrapment capabilities of the GAC, the KDF/GAC can remove or greatly reduce a wide range of contaminants through to 30,000 litres.

The KDF media also provides a bacteriostatic effect which is hostile to algae, fungi and bacteria. The OKDF30/1 is also Cyst safe.

UNDER BENCH FILTER DETAIL

OBLIO SINK MIXER WITH WATER FILTER

XERA GOOSENECK SINK MIXER WITH WATER FILTER

## STAINLESS STEEL SINK MIXER WITH PULL-OUT SPRAY

Manufactured from stainless steel that is easy to keep clean and will hold its look for a number of years. The pull out spray hose is Nylon which is both hard wearing and able to draw through the mixer with ease as there are no edges to catch on the sides of the mixer.

There is also a pivoting ball at the end of the hose to allow for more flexibility on the angle of the head than you would get on a normal pull out spray sink mixer.

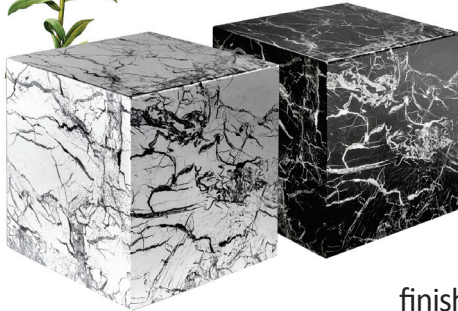

STAINLESS STEEL SINK MIXER WITH PULLOUT SPRAY

# TAPWARE TRENDS

Tapware has gone beyond being purely functional. It is now a reflection of how we view our most personal space and this transcends traditional ideas.

The visual experience is now enhanced with a range of exciting tactile materials and even aromas which all contribute to creating a desired mood and feel. The coolness of chrome contrasts with the warmth of wood and the drama of black is offset by the purity of ice white. Add exciting copper touches and marble finishes to tastefully push boundaries and create new experiences.

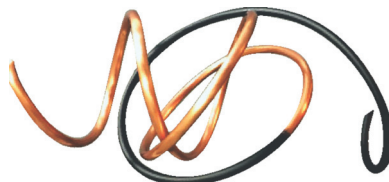

For those homes that reflect a bygone era, we have a range of tapware to romance the soul. We have combined all the beauty of a traditional look with modern technology and functionality.

Aquatica is helping to create wonderful spaces by providing the most exciting ranges of tapware, bath tubs, accessories, shower enclosures and vanities to compliment any mood and design statement.

**Bathrooms and even kitchens can become sensational feature areas of the home adding to the style and also the value.**

# TAPWARE

Aquatica is one of New Zealand's leading tapware providers. With our onsite design, manufacture and testing facilities we are able to provide the latest innovations in quality tapware that carry our excellent guarantee and backing.

## BATH SPOUTS & FILLERS

Aquatica has a range of bath spouts from purely functional spouts to designer waterfall spa spouts that are a feature in themselves.

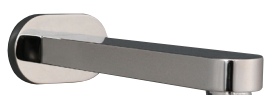

# BATH SPOUTS

Aquatica offers an extensive range of bath spouts, from beautiful waterfall spa spouts to elegant designer standard bath spouts. There's even a spout that can divert between the bath spout and a handshower - great for bathing the children

**XERA BATH SPOUT 200**  
BS XERA200  
15mm INLET, 200mm LONG

Bath spouts are generally suitable for all pressures.  
Only spouts with internal restrictions are rated mains pressure only.

An aerator could restrict flow on low pressure systems but this can be replaced with a flow guide.  
Adding a diverter will restrict flow slightly.

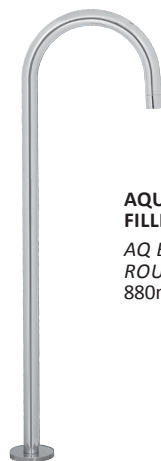

# BATH FILLERS

Aquatica bath fillers cater for any style of bathroom and range from the elegantly simple to modern with shower divertors that will add an extra dimension to any bathing experience.

10 Year Cartridge Warranty.

# RAIN HEADS

Aquatica's range of rain heads offers style and functionality for those who enjoy a significant soaking or a delicate drenching. Available in a round, square or oval design.

Suitable all pressures. Minimum pressure required at head 35kPa (except where noted).

2 Year Warranty.

Hint: for a truly minimalistic look, mount a large rose directly on the ceiling.

The Titan quietly disposes of almost anything - fish bones, coffee grinds, grapefruit halves, nut shells & much more.

2 or 3 Year Warranty (as below).  
No warranty available for commercial use

**TITAN 960**  
AQ TITAN 960

- 3/4 HORSE POWER
- FULL SOUND INSULATION
- STAINLESS STEEL GRINDING COMPONENTS
- RPM2700
- OVERLOAD SWITCH
- PERMANENT MAGNET MOTOR
- BALANCED GRINDING SYSTEM
- 3 YEAR WARRANTY

**TITAN 760**  
AQ TITAN 760

- 1/2 HORSE POWER
- BUILT-IN AIR SWITCH
- FULL SOUND INSULATION
- STAINLESS STEEL GRINDING COMPONENTS
- RPM2600
- OVERLOAD SWITCH
- PERMANENT MAGNET MOTOR
- BALANCED GRINDING SYSTEM
- 2 YEAR WARRANTY

**TITAN 660**  
AQ TITAN 660

- 1/2 HORSE POWER
- PARTIAL SOUND INSULATION
- STAINLESS STEEL GRINDING COMPONENTS
- RPM2600
- OVERLOAD SWITCH
- PERMANENT MAGNET MOTOR
- BALANCED GRINDING SYSTEM
- 2 YEAR WARRANTY

#### FEATURES INCLUDE:

- Torque Master advanced balanced grinding system for faster grinding
- Bioshield anti-microbial protection to reduce germs and odours
- RPM 2700 – Maximum torque & high speed
- Corrosion proof grind chamber and drain housing
- Stainless steel grinding components for long lasting durability and no failure due to corrosion
- Speed Master mounting system for fast installation
- Removable splash guard
- Full sound insulation (760 and 960); partial sound insulation 660
- Overload switch to protect your motor if there is food jammed in the grinding chamber
- Balanced turntable reduces vibration and noise
- 3 year warranty for 960; 2 year warranty for 760 and 660

- AS/NZS 60335.2.16.2006 – Complies with NZ Domestic Waste Disposer Electrical Standards

We do not recommend the following to be placed into the disposer:

- Potato skins
- Stringy food such as celery and banana skins

The disposer is for food waste only so non-food items should not be put down the disposer.

#### OPTIONAL ACCESSORIES

**SILVERGUARD**  
AQ SHARK MAGNET

A strong magnet which attracts kitchen utensils and other miscellaneous metal objects from falling into the disposer

**PLUG & DISPOSER TOOL**  
AQ SHARK SCRAPPY

A multi-purpose tool that functions as a plug and a plunger to push waste into the disposer

**MR SCRAPPY DISPOSER BRUSH**  
AQ TITAN BRUSH

Unique design that fits nicely in your food waste disposer to help reduce germ and bacterial build up. Cleans and scours and features a key-grip handle to help brush turn easier

**SINGLE AIR SWITCH WITH SWITCHED AND UNSWITCHED OUTLETS**  
AQ SHARK AIR SWITCH

Can be installed on your sink or benchtop around wet areas

## Commercial Use

- Tapware - 1 year warranty
- Laundry Tub Cabinet – 2 year warranty
- Handshowers, Shower Roses – 1 year warranty
- Pull-out Sprays and spray heads on Sink Mixer Coils – 1 year warranty

Only high quality workmanship and materials have been used in the manufacture of Aquatica's bathroomware and kitchenware. If any workmanship or material is proven faulty during the warranty period, Aquatica NZ Limited will, at its own cost or option, repair or replace the faulty product.

The warranty is transferable but the original proof of purchase from an authorised Aquatica distributor is required for all claims.

Aquatica's liability will not extend to damage caused by reasonably foreseeable loss such as inappropriate materials in a wet area ie. floating wooden floors.

Waterlines to tapware incorporating a ceramic cartridge or ceramic disc mechanism should have an inline strainer or filter fitted. Absence of these may void the warranty.

Any suspected defect must be notified to Aquatica as soon as possible after discovery. All repair work must be performed by a plumber who has received authorisation from Aquatica prior to proceeding with the work. Aquatica may immediately authorise repair work to be undertaken, however, this is not necessarily acceptance of liability.

Aquatica guarantees that the tapware will be able to handle temperatures up to a maximum of 80°C.

Water pressure up to 1000 kPa is the maximum limit for the tapware. Above this the warranty will become void.

Serial numbers or tags should not be removed from the products as they are essential in establishing warranty.

Every effort has been made to show the products as they will be sold, however, all models and specifications are subject to change without notice.
